

Bill Webb, P.L.S. Project Surveyor

Education:

Associate of Applied Science
Tulsa Community College

Registration:

Professional Land Surveyor – Oklahoma

Years Experience:

13 Years

Years with TSE:

2 Years

Professional Experience:

Bill's experience covers a wide range of boundary, engineering and construction surveying. Bill currently works in our Claremore, Oklahoma office as a surveyor/CAD technician and provides all necessary field surveying as well as calculations, deed reviews, description writing, etc. as required by the engineering projects for that office.

Relevant Experience:

Transportation Survey Experience

Bill has extensive experience in providing construction staking, staking right-of-way, topographic surveying and boundary surveying for the construction of new streets and intersection improvements. Additionally, Bill has worked with other TSE surveyors in the pre-engineering design survey for a railroad separation project through Claremore, OK.

His previous experience with other firms and most recent experience with TSE combined, make Bill an experienced surveyor for Street and Highway construction.

Construction Staking

Bill has provided construction staking for infrastructure projects including roadways, sewer systems, water systems, and site grading.

Engineering Surveys

Our in-house engineers as well as other engineering firms rely on Bill and TSE Surveyors for accurate and timely pre-engineering design surveys. These surveys help engineers by locating built features, establishing vertical & horizontal controls, and locating utilities.

** Some Project Experience was accomplished while with a previous firm.*
