

Transportation Projects

Howard Bush Drive

Neosho, MO Industrial Park
City of Neosho, MO

CHALLENGE

Major industrial truck traffic was routing on Industrial Drive which paralleled the Kansas City Southern Railroad. The railroad traversed a dangerous at-grade crossing only 180' from a stop sign intersection.

SOLUTION

TSE was selected to design plans for the extension of Howard Bush Drive from the Industrial Park north to Route 60 in Neosho, MO. This new roadway provides an improved truck access point to Route 60 at a new signalized intersection and eliminates the dangerous at-grade crossing with the Kansas City Southern Railroad.

SPECIAL FEATURES

- Funded by a CDBG economic development grant and a MoDOT cost share agreement.
- Designed to minimize impacts to an existing 16" D.I. pressure sewer along the corridor.
