

# Sanitary Sewer Projects

## Quapaw Casino Miami, OK

### CHALLENGE

The Quapaw Tribe of Oklahoma's gaming facility was served by a wastewater two-cell lagoon system. The lagoon system frequently flooded during heavy rain events causing environmental concern. The lagoons had to be pumped regularly during wet weather.

### SOLUTION

TSE was hired to provide a treatment solution that would replace the lagoon system efficiently with cost savings. TSE's Tom Moore, P.E., recommended a gravity sewer, lift station and pressure sewer distribution line to the Miami Industrial Park.
